

Employment Opportunities

You have worked hard to get where you are. You graduated from chiropractic school, worked hard getting through the national boards and your state boards. It is possible that you worked hard in another practice for a time or had your own practice and now would like to relocate. You deserve to work in an environment where you can practice your chosen field using all of your skills, where mutual respect is not just a cliché, where you have great opportunity for growth and to make a respectable salary.

Hello, my name is Dr. Frank Heresco of Heresco Chiropractic and Associates. Our clinics are always looking for the brightest chiropractic physicians who have a vision of excelling in this profession. Whose heart is to help communities stay well and get healthy and to do whatever it takes to aid a patient; ethical, hard working individuals that will always do the right thing even when no one is watching. If this sounds like you, send us an email with your Curriculum Vitae, a recent photo, and references. Use the link on this website to ensure your email does not go to my junk email. Once we have had a chance to contact your references, usually about 7 days, we will contact you and set up a phone interview and go from there. I would prefer that you have your Oregon license before contacting the office.

Our Corvallis office has many tools in its tool box for our DC's to choose from. We have Elevation Adjusting tables that are equipped with pelvic drop pieces, electronic health records, digital x-ray, and a sophisticated central computer system. We have 4 massage therapists that are the best in the business; we have muscle strengthening rehabilitation and lumbar decompression therapy.

Corvallis is located in, and has the nick name, "The Heart of the Valley". That is the Willamette Valley. We are about an hour from the beautiful Oregon Coast, an hour and a half from snowboarding, mountain lakes, and some of the most gorgeous scenery in North America. Portland is an hour and a half north with all of its metropolitan activities. Corvallis is a university town, the home of Oregon State University. It takes about 10 minutes to drive to see the OSU Beavers play football, basketball, volleyball and other university events. The Willamette River meanders through downtown. It truly is an amazing place to live and even raise a family. We have one of, if not the best, school district in the state.

If this sounds appealing to you, drop Heresco Chiropractic an email. I look forward to hearing from you.
