Informed Consent to Chiropractic Treatment

Medical doctors, chiropractic doctors, osteopaths, and physical therapists that perform manipulation are required by law to obtain your informed consent when starting treatment.

I _____(Patient's Name), of _____(Town of Residence) hereby give my consent to the performance of conservative noninvasive treatment to the joints and soft tissues. I understand that the procedures may consist of manipulations/ adjustments involving movement of the joints and soft tissues. These manipulations/adjustments may be **performed by any of the chiropractors on staff** at this office. Physical therapy and exercises may also be used. Although spinal manipulation/adjustment is considered to be one of the safest, most effective forms of therapy for musculoskeletal problems, I am aware that there are possible risks and complications associated with these procedures as follows:

_____ Soreness: I am aware that like exercise it is common to experience muscle soreness in the first few treatments.
Initials

_____ Dizziness: Temporary symptoms like dizziness and nausea can occur but are relatively rare.
Initials

_____ Fractures/Joint Injury: I further understand that in isolated cases underlying physical defects, deformities or pathologies like weak bones from
Initials osteoporosis may render the patient susceptible to injury. When osteoporosis, degenerative disk, or other abnormality is detected, this office will proceed with extra caution. If a tendon is weak or partially torn, manipulation may cause it to tear the rest of the way.

_____ Stroke: Although strokes happen with some frequency in our world, strokes from chiropractic adjustments are rare. I am aware that nerve or brain
Initials damage including stroke is reported to occur once in one million to once in ten million treatments. Once in a million is about the same chance as getting hit by lightening. Once in ten million is about the same chance as a normal dose of aspirin or Tylenol causing death.

_____ Physical Therapy Burns: Some of the therapies used in this office generate heat and may rarely cause a burn. Despite precautions, if a burn is
Initials obtained, there will be a temporary increase of pain and possible blistering. This should be reported to the doctor.

_____ Tests have been performed on me to minimize the risk of any complications from treatment and I freely assume these risks.
Initials

_____ **Treatment Results** I also understand that there are beneficial effects associated with these treatment procedures including decreased pain,
Initials improved mobility and function, and reduced muscle spasm. However, I appreciate there is no certainty that I will achieve these benefits. I realize that the practice of medicine, including chiropractic, is not an exact science and I acknowledge that no guarantee has been made to me regarding the outcome of these procedures. I agree to the performance of these procedures by my doctor and such other persons of the doctor's choosing including other chiropractors that work for this office and certified assistants.

_____ **Alternative Treatments Available**
Initials Reasonable alternatives to these procedures have been explained to me including rest, home applications of therapy, prescription or over-the-counter medications, exercises and possible surgery.

_____ Medications: Medication can be used to reduce pain or inflammation. I am aware that long-term use or overuse of medication is always a cause for
Initials concern. Drugs may mask pathology, produce inadequate or short-term relief, undesired side effects, physical or psychological dependence, and may have to be continued indefinitely. Some medications may involve serious risks.

_____ Rest/Exercise: It has been explained to me that simple rest is not likely to reverse pathology, although it may temporarily reduce inflammation and
Initials pain. The same is true of ice, heat, or other home therapy. Prolonged bed rest contributes to weakened bones and joint stiffness. Exercises are of limited value but are not corrective of injured nerve and joint tissues.

_____ Surgery: Surgery may be necessary for joint instability or serious disk rupture. Surgical risks may include unsuccessful outcome, complications, pain
Initials or reaction to anesthesia, and prolonged recovery.

_____ Non-treatment: I understand the potential risks of refusing or neglecting care may include increased pain, scar/adhesion formation, restricted mo
Initials motion possible nerve damage, increased inflammation, and worsening pathology. The aforementioned may complicate treatment making future recovery and rehabilitation more difficult and lengthy.

I have read or have had read to me the above explanation of chiropractic treatment. Any questions I have had regarding these procedures have been answered to my satisfaction PRIOR TO MY SIGNING THIS CONSENT FORM. I have made my decision voluntarily and freely.

To attest to my consent to these procedures, I hereby affix my signature to this authorization for treatment.

Our primary focus is to take care of you and your health condition. We do our best to help you spend your healthcare dollars wisely and effectively. We treat our patients, not your insurance company. If recommended treatment of your condition goes beyond your insurance company's maximum for the year, we will try to notify you of it as soon as we know. Be aware that when we bill your insurance company, it can take up to 45-60 days to get a response from your insurance. **Please be advised that any treatment accrued during this lag time will be your responsibility. MEDICARE -Medicare ONLY covers the cost of the chiropractic adjustments designed to help correct a vertebral subluxation. An examination is necessary to identify a vertebral subluxation. Medicare requires this and doesn't pay for the cost of the exam or any needed x-rays. Procedures like massage, traction, electric muscle stimulation or other therapies are **NOT COVERED** by Medicare. Medicare does not pay for chiropractic care to maintain your progress or help prevent problems. Most patients see the value of some type of wellness care, Medicare does not pay for the coverage of it.
